Historic Event	Event Type	Min Date	Max Date	Classification	Type	Description
	Created	1808	1809	Landscape Park	Created	The Anglo-Saxon name of Tedena was first documented in 1168 and at that time the area of fertile land that represented Thedden was 1000 acres. In 1233 the King granted all his land in Alton to the Bishop of Winchester, some of which was passed on for the foundation of Selborne Priory. This in turn was endowed in 1485 to Magdalene College , Oxford by Bishop Wayneflete including much of the land

around Thedden although the present 45 acres of parkland has always remained a freehold. The earliest map is 1676 when Lewis Andrewes, surveyor for Magdalene College, produced a map of field boundaries, remarkable for their similarity to present field patterns. Both the 1759 Taylor map and the 1791 Milne map show a house on the site with a prominent avenue of trees leading to the Bentworth Road. In 1808 at a public auction, Thedden, consisting of 369 acres of arable land and 116 acres of the finest coppice land was bought by Sir Laurence Halsted, a naval man, who before rising to the ranks of Admiral had been the Captain of the Phoenix. He built a new mansion on a higher eminence than the previous manor and renamed it Phoenix Lodge. He also laid out the parkland as it is today following the fashion of the time, with rolling lawns that came up to the house, and trees planted in clumps and individually. In 1835 Halsted was forced to sell for financial reasons and the estate was bought by a wealthy Yorkshire mill owner John Wood, philanthropist and pioneer of factory reform being the mov

	Cartographic Depiction	1676	1910	N/A	Various historic maps including a survey for Magdalene College, Oxford of 1676 show the area prior to and during the development of the park.

Investigation	Type	Min Date	Max Date	Investigation Method	Description
	Research	2000	2001	N/A	Research and site visit undertaken by S Carey-Thomas, 2000/01. The parkland trees consist predominantly of oak ,chestnut, beech and lime. Many beeches were lost after the 1976 drou and the 1987 hurricane brought down more. The remaining trees, plus newly planted replacements still confer the feeling of a C19 park and being 600 feet above sea level, there ar commanding views to the SE. The walled kitchen gardens remain as well as coach-house, clocl tower and ornamental woods. Near the house are some notable trees, ie Deodar Cedar, Lucombe Oak, Wellingtonia and Yew.

54858	Monument	Possible Post Medieval Limekiln, Millers Wood	<null>	A deep pit next to a disused chalk pit was investigated in 1931 and was thought may have been a limekiln.	<null>	<null>	<null>

Historic Event	Event Type	Min Date	Max Date	Classification	Type	Description
	Unassigned	9999	9999	Pit	Unassigned	(1) A deep pit was investigated in 1931 which was situated next to the chalk pit. The pit was circular, about 15ft in diameter at the bottom and 30 to 40ft deep - it nipped in sharply about half way down and was carefully cut out.

Historic Event	Event Type	Min Date	Max Date	Classification	Type	Description
	Unassigned	1540	1900	Lime Kiln	Unassigned	(1) The deep jar shaped pit was thought to be a limekiln with the sides of the shaft fallen in from exposure to the weather or from the fact that a beech tree was growing partly over the mouth of the shaft. Although one of the investigators, a professor of geology, pointed out that the chalk was not split through heat exposure which you would expect if it had been a limekiln.

Historic Event	Event Type	Min Date	Max Date	Classification	Type	Description
	Unassigned	1540	1900	Chalk Pit	Unassigned	(1) An old chalk pit which was visited in 1931.

54860	Monument	Possible Smugglers Cache, Wivelrod	<null>	A chamber was discovered in the chalk pit which may have been used as a smugglers cache.	<null>	<null>	<null>

Historic Event	Event Type	Min Date	Max Date	Classification	Type	Description
	Unassigned	1540	1900	Chalk Pit	Unassigned	(1) A disused chalk pit visited in 1929.

Historic Event	Event Type	Min Date	Max Date	Classification	Type	Description
	Unassigned	1540	1900	Smugglers Cache	Unassigned	(1) Within the chalk pit was a low entrance which led to a room 9 and half feet long with a floor 3ft wide. The chamber was curved at the further end and was evidently cut out. A large number of bricks had been cleared out of the place which had once formed a ceiling. Nothing was noted which may have indicated a date or use. It had

been suggested that it may have been a smugglers cave as nearby Culwood Copse, now the site of the abbey, was especially noted as a haunt for smugglers.

Investigation	Type	Min Date	Max Date	Investigation Method	Description
	Personal Observation	1929	1929	N/A	(1) Observations made in 1929 from the Warner manuscript the original of which is in the Bodelian Library, Oxford.

12671	Historic Building	Wyards Farm House	<null>	A farmhouse built in c1691.	Listed Building	Grade II*	13/03/1951
Historic Event	Event Type	Min Date	Max Date	Classification	Type	Description	
	Built	1691	1691	Farmhouse	Built	(1) The builder of Wyard's gave the front six bays so that it was impossible to place the front door in an exactly central position. Unlikely the four square brick box common in the C18 this early C17 house has a stair tower at the rear.	
Investigation	Type	Min Date	Max Date	Investigation Method	Description		
	Bibliographic Reference	2003	2003	N/A	Inscribed Date: 1691. A brick house with two principal storeys, a dormered attic within a butt-purlin roof, and a cellar. The hipped roof has a projecting eaves cornice with modillions. Most of the original cross-frame windows survive. A stair-passage with a rear staired tower separates the two principal ground-floor rooms. The date "1691", picked out in blue headers the front elevation, is entirely consistent with the main features of the house. It was a proper of Winchester College whose lessee, Robert Kercher as son of a clergyman, built the house for himself and his widowed mother. in 1722, it was a farmhouse with 98 acres attached and 37 acres elsewhere.

Investigation	Type	Min Date	Max Date	Investigation Method	Description
---------------	------	----------	----------	----------------------	-------------

Listing	2007	2007	N/A	<p>Large prefabricated colonial style bungalow, probably built around 1903, and constructed from prefabricated timber-frame clad in corrugated iron sheets.</p> <p>EXTERIOR: It is of a single storey with attic and has a corrugated iron roof with gables ends. The south garden front has a gabled wing to the left of centre, and a window and verandah to left and two windows to the right with French casement between. The verandah has wooden posts and Tudor arches with pierced spindrels. On the east end is a squat tower with a timber verandah and balcony above supporting the deep eaves of the glazing bars in top lights. There also a later conservatory in the southeast angle. At the rear is a later outshut and a small lavatory wing is attached to the northwest rear corner.</p> <p>INTERIOR: The walls and ceilings are lined in match boarding and cast-iron chimneypieces and original joinery, including pannelled doors and staircase with turned newels, survive.</p> <p>HISTORY: Norton Bavant appears for the first time on the 1:2500 third edition OS map of 1910 and appears essentially in its current form. The land where the building is situated was bought by one Elizabeth Grace in 1899, who also owned other plots of land in Beech. She was subsequently granted permission by Alton Urban District Council to build domestic dwellings on her land in both 1902 and 1904. It is likely that one of these permissions related to the building of Norton Bavant. The land, and bungalow, were sold to a Mrs Eliot in 1907, and is registered under its current name for the first time on 1908. Bertha Marion Alexander and Constance Marjorie Alexander, granddaughters of Michael Solomon Alexander, Bishop of Jerusalem 1841-1845, were recorded as resident at the property of the Electoral Register of 1922 and stayed here until 1934.</p> <p>SUMMARY OF IMPORTANCE: Norton Bavant is of special interest as an early-C20 pre-fabricated corrugated iron-clad domestic dwelling with attractive detailing, such as the verandahs and tower. Ornate pre-fabricated bungalows were erected around the start of the C20 and this example survives well and is a relatively rare survival of the type.</p> <p>SOURCES: JG Wathen, Beech and Beyond from Farm to Village 1239-1990 (London, 1996), 42-43 Bibliography: Beech and Beyond from Farm to Village 1239 to 1990 (JG Wathen), 1996, Page(s) 42-43 Listing NGR: SU6922738912</p>

54167	Historic Building	Milestone South East Of Entrance To Wyards Farm	<null>	A listed milestone erected in the early C19.	Listed Building	Grade II	31/01/2003

Historic Event	Event Type	Min Date	Max Date	Classification	Type	Description
----------------	------------	----------	----------	----------------	------	-------------

Built	1800	1825	Milestone	Built	See list description.
-------	------	------	-----------	-------	-----------------------

Investigation	Type	Min Date	Max Date	Investigation Method	Description
	Listing	2006	2006	N/A	<p>Milestone of early C19 date. It is a square Portland stone pillar with a domed top and it has two cast iron plaques affixed to its sides. The inscription on the north west facing plaque reads 'Alton 1' and that on the south west reads 'B'stoke 10'.</p> <p>HISTORY: This milestone marks the turnpike road between Alton and Basingstoke, which was given its first turnpiking authorisation by an Act of Parliament in 1795, and which was renewed in 1816. This also required the erection of milestones along its route, and this stone was probably erected soon after the Act was passed. The first edition OS map suggests that it is still in its original location.</p> <p>SUMMARY OF IMPORTANCE: Milestones are of special interest as they are among the few physical remains of national and local historic road use. The turnpike roads created in C18 and C19 were an important development in British road transport, and the milestones and other road furnishings accompanying them are important reminders of that. This milestone survives well and marks the turnpike road between Alton and Basingstoke. It forms a group with another surviving milestone (separately listed) and together they form a significant survival of the stone that would originally have marked each mile between the two towns.</p>

Investigation	Type	Min Date	Max Date	Investigation Method	Description
	Listing	2003	2003	N/A	<p>Milestone. Early C19. Painted stone with cast-iron plates. Square stone with worn rounded top and with cast-iron plates on two sides inscribed: Alton 1 and B'stoke 1. The Basingstoke, Prescot, Candover and Alton turnpike was opened in 1795 and this is one of a series of milestones on the turnpike. A good example of an early C19 milestone with inscribed cast-iron plates.</p>
