

THIS DRAWING IS TO BE USED ONLY FOR THE PURPOSE OF ISSUE THAT IT WAS ISSUED FOR AND IS SUBJECT TO AMENDMENT

- LEGEND**
- East Hampshire District Boundary
 - Town
 - South Downs National Park
 - Highly compatible for infiltration SuDS
 - Opportunities for bespoke infiltration SuDS
 - Probably compatible for infiltration SuDS
 - Very significant constraints are indicated
 - Main Rivers

NOTES

1. The 1:50,000 scale digital map data is generalised and the groundwater flood risk interpretation should only be used as a guide to risk at a local level, not as a site specific assessment of risk which should be based on more detailed site specific information.

Descriptions of each of the categories are as follows:

- Highly compatible for infiltration SuDS: The sub-surface is likely to be suitable for free draining infiltration SuDS.
- Probably compatible for infiltration SuDS: The sub-surface is probably suitable for infiltration SuDS, although the design may be influenced by ground conditions.
- Opportunities for bespoke infiltration SuDS: The subsurface is potentially suitable for infiltration SuDS, although design will be influenced by the ground conditions.
- Very significant constraints are indicated: There is a very significant potential for one or more geohazards associated with infiltration.

2. This map is intended to provide a strategic overview of infiltration SuDS suitability and should not be used to approve or discount infiltration SuDS for individual properties.
