

Land Availability Assessment (LAA) Results

Disclaimer

The Council does not accept liability for any factual inaccuracies or omissions within the Land Availability Assessment ('LAA'). The information within the LAA represents the best information available at the base date of 31st March 2024. Information, planning permissions and additional sites received since this date have been included where necessary to provide an accurate assessment.

Readers of this document are advised that additional constraints, which may have not been considered or listed, may apply to the identified sites and that planning applications will continue to be determined on their own merits, rather than on the information contained within this study. Issues may arise during the planning application process that could not have been foreseen in the preparation of the LAA. Landowners and applicants are advised to carry out their own analysis of site constraints for planning applications.

1 Introduction

1.1 What is a LAA?

- 1.1.1 The LAA is an evidence base document only. It lists all possible sites that have been put forward for development, this includes, but not limited to, housing and economic development, and provides an assessment of the potential of those sites for development. Once completed, it forms part of the planning policy evidence base for the Council's Local Plan.
- 1.1.2 The role of the LAA is to provide a high-level assessment of sites submitted for particular uses (excluding the SDNP area), including whether sites are considered suitable for development and outlines prospective timescales for a site's potential development. It is not a statement of Council policy and the document does not allocate land for development. It is for the Local Plan process itself to determine which of those sites are the most suitable to meet the identified needs.
- 1.1.3 This LAA results document should be read in conjunction with the [LAA Methodology \(2024\)](#).

1.2 Why do we need to prepare a LAA?

- 1.2.1 The assessment of land availability is a key element of a Local Plan evidence base and its preparation is an important step in the development of Local Plans. The [Planning Practice Guidance \(PPG\)](#) states that an assessment should:
- identify sites and broad locations with potential for development.
 - assess their development potential.
 - assess their suitability for development and the likelihood of development coming forward (the availability and achievability).
- 1.2.2 The aim of the LAA is to identify all sites that are considered 'suitable' for development and to put those sites forward within the plan-making process for further assessment, particularly through the Integrated Impact Assessment (IIA) which incorporates Sustainability Appraisal (SA), Strategic Environmental Assessment (SEA), Equalities Impact Assessment (EqIA) and Health Impact Assessment (HIA).
- 1.2.3 For economic development sites, the LAA will need to identify there is a sufficient supply of suitable economic development sites within East Hampshire District to meet identified needs for employment use.
- 1.2.4 If it is found that there is insufficient suitable housing and employment sites to meet the identified needs of the district, then all such then all such suitable sites will be reassessed through the LAA in particular those sites that are currently unavailable and may become available or where site capacity could be increased.
- 1.2.5 To reflect the PPG, the LAA will also consider the availability of land for other uses, including, but not limited to, Gypsy, Traveller and Travelling Showpeople accommodation; infrastructure; open space and Suitable Alternative Natural Greenspace (SANG).

1.3 Format of this document

- 1.3.1 The methodology used in the preparation of the LAA is based upon the approach set out in the [PPG](#). The [LAA Methodology](#) (2024) document should be read alongside this document. The methodology sets out, in detail, the process of assessing the sites and how the outputs in this document were determined.
- 1.3.2 It should be noted that the LAA is presented by site, rather than land use. This avoids the repetition of sites, as some sites can accommodate more than one land use. Each site has an individual reference code and is mapped on the interactive mapping with details of suitability, availability and achievability of the site, with constraint layers available.
- 1.3.3 This document presents the results from the LAA. Alongside this document, the interactive map shows all LAA sites. All sites are categorised as either 'included' (sites that are deliverable or developable), excluded (sites that are considered undevelopable), sites with planning permission or rejected sites. All included sites will subsequently be considered further through the IIA and any other relevant site selection processes. All sites are shown on the interactive map and coloured coded accordingly:
- Included sites – green
 - Excluded sites – red (with reasons why the site has been excluded)
 - Sites with planning permission – yellow
- 1.3.4 Sites that are too small and do not meet the site size threshold, or capacity threshold are 'rejected sites' and are not shown on the interactive mapping. These sites are listed in Appendix B of this document. Any sites rejected throughout the LAA process due to site size, does not necessarily mean they are unsuitable for development and does not prejudice the site coming forwarded via a planning application.
- 1.3.5 To reflect the PPG¹ sites with planning permission are generally considered suitable for development, having been fully assessed through the planning application process. Delivery rates are monitored as part of the Five-Year Land Supply and there is little evidence to suggest these sites will not come forward. Sites with planning permission are counted in the Five-Year Land Supply and therefore to avoid double counting, they are not counted in the supply of LAA sites in the conclusion of this document. These sites are shown on the interactive map in yellow and listed in Appendix C of this document.
- 1.3.6 The initial assessment may consider sites unsuitable for development taking into account national policy and designations. These sites will be identified as 'Excluded Sites' where it would not be appropriate to carry out further detailed assessments. Excluded sites are listed in Appendix D of this document and shown on the interactive map with a red outline. The associated attribute table for the excluded sites will include the reason for exclusion.
- 1.3.7 Those sites that are not excluded will be carried forward for more detailed assessment through the IAA and other evidence base documents, for consideration through the Local Plan process.
- 1.3.8 The Council operates a 'rolling' call for sites, so that details of sites can be submitted at any time. After 31st March each year, additional sites may be assessed, depending on resource. This will enable technical work to be undertaken on sites.
- 1.3.9 This report should be read in conjunction with the [LAA Methodology](#) (2024), [East Hampshire District Council's Windfall Allowance: Methodology Paper](#) (2024) and [Five-Year Housing Land](#)

¹ Paragraph: 018 Reference ID: 3-018-20190722

[Supply Position Statement](#) (2023). It should be noted that the LAA only covers those parts of East Hampshire that fall outside the South Downs National Park (SDNP), Figure 1 below shows the different areas.

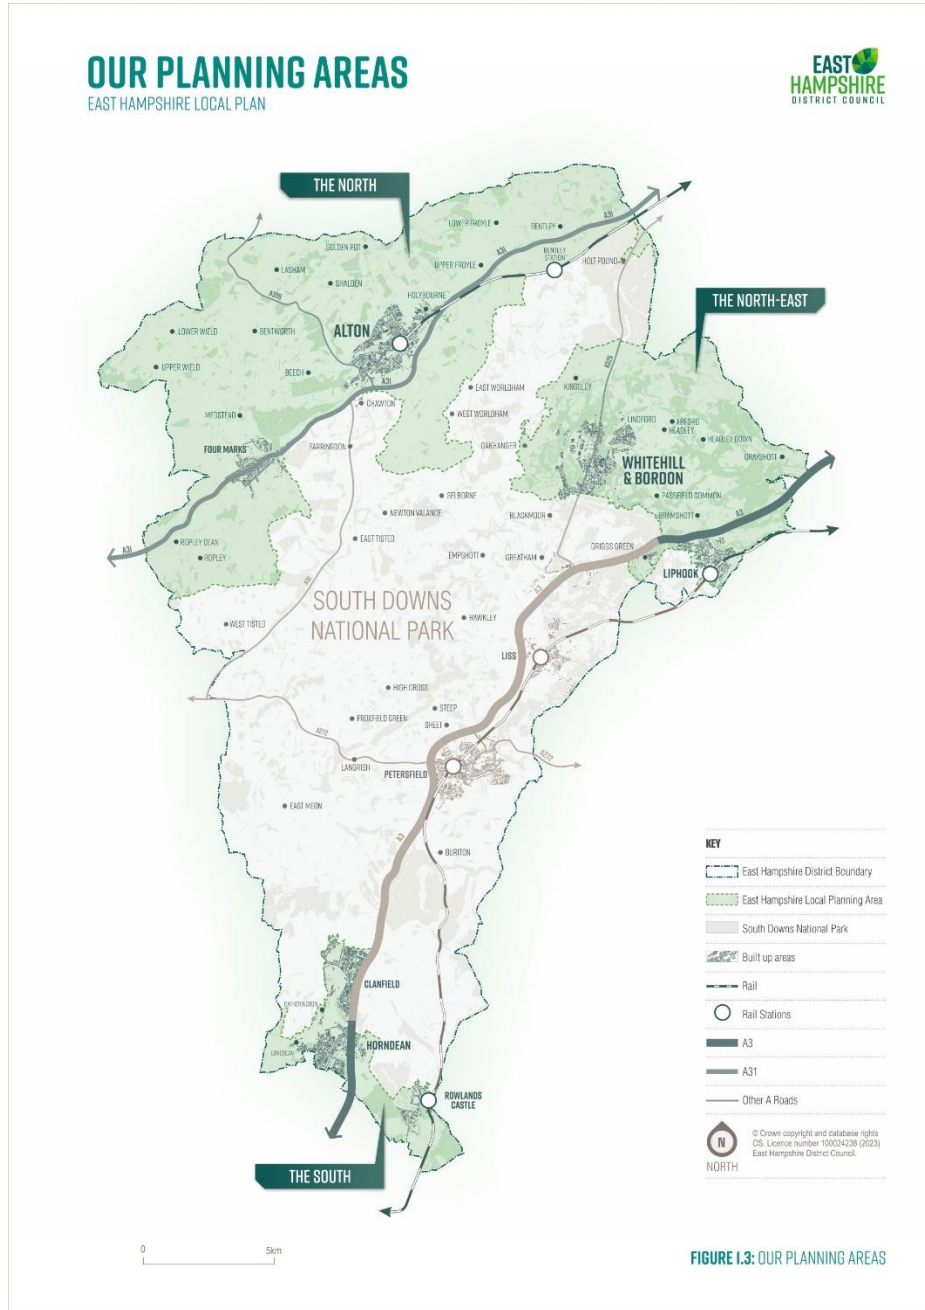

Figure 1: Map of East Hampshire District

Traveller Sites (Gypsy, Traveller and Travelling Showpeople Sites)

- 1.3.10 For planning purposes, the term 'Traveller' refers to Gypsy, Traveller and Travelling Showpeople.
- 1.3.11 Sites submitted to the Council or identified through the desktop exercise for possible use as Traveller accommodation will be assessed separately to those promoted for residential or other uses. This is in recognition of the level of need and stand alone national planning policy in the form of [Planning Policy for Traveller Sites \(PPTS\)](#).
- 1.3.12 Each site considered for Traveller accommodation will be assessed on its own merits, taking account of previous planning history, constraints and guidance in PPTS. The key constraints in Table 1 apply to Traveller accommodation. In addition, the constraint regarding flood risk is even greater for Traveller accommodation, as mobile homes are categorised as a highly vulnerable use in flood risk terms. This further limits potential land for this use.

2 Windfall Assessment

- 2.1.1 Windfall sites are defined in the NPPF as “sites not specifically identified in the development plan”. Local authorities are allowed to make an allowance for windfall sites as part of anticipated supply. However, local authorities may only make an allowance for windfall if they have “compelling evidence that they will provide a reliable source of supply”. In addition to this, any windfall allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends.
- 2.1.2 A windfall study and information relating to housing land supply are published separately to this assessment and can be found online [here](#). It demonstrates that based on historic windfall rates, windfall sites have consistently come available within East Hampshire (outside the SDNP) even during a time of economic recession. As a result, the windfall study 2024 proposes a full small site windfall allowance of 54 dwellings per annum from year four onwards. Additionally, a large site windfall allowance of 61 dwellings per annum will be made from year eleven onwards. As of 1st April 2024, this amounts to a total of 1,068 dwellings (702 on small sites, 366 on large sites) remaining across the residual emerging plan period (2024-2040).

3 Assessment Review (Results)

3.1.1 The PPG confirms that once all the sites and broad locations have been assessed, the development potential of included sites (outside the SDNP) can be collected to produce an indicative trajectory. This should set out how much housing development and the amount of economic development that can be provided over the Plan period and at what point in the future (i.e. 1-5 years, 6-10 years, or 11 years and beyond). However, as discussed previously, all such sites submitted to the LAA and found to be suitable, available and achievable will still need to be considered through the plan-making process and specifically the IIA, as well as the emerging policies of the Local Plan. The LAA is therefore the starting point to identify deliverable sites. A housing trajectory will be included as part of the emerging Local Plan.

3.1.2 The PPG is clear that if insufficient sites are identified to meet objectively assessed need, the assessment will need to be revisited:

“It may be concluded that insufficient sites / broad locations have been identified to meet objectively assessed needs, including the identified local housing need.

In the first instance, strategic policy-making authorities will need to revisit their assessment, for example to carry out a further call for sites, or changing assumptions about the development potential of particular sites to ensure these make the most efficient use of land. This may include applying a range of densities that reflect the accessibility and potential of different areas, especially for sites in town and city centres, and other locations that are well served by public transport.

If insufficient land remains, then it will be necessary to investigate how this shortfall can best be planned for. If there is clear evidence that strategic policies cannot meet the needs of the area, factoring in the constraints, it will be important to establish how needs might be met in adjoining areas through the process of preparing statements of common ground, and in accordance with the duty to cooperate.” (Paragraph: 025 Reference ID: 3-025-20190722).

3.1.3 There was a total of 481 sites considered within the 2024 LAA. Each site identified in Stage 1 and 2 was assessed to determine if it had any development potential and, if so, when it could be brought forward. All details of candidate sites are available on the interactive mapping with detailed information on the associated attribute table.

3.2 Stage 1

3.2.1 From the analysis of the sites, 91 sites were ‘rejected’ as they did not meet the site size. These are listed in Appendix B.

3.2.2 47 sites had planning permission and some previous LAA sites have been completed within the previous year and therefore have been removed from the LAA. Those sites with planning permission are generally considered suitable, having been assessed through the planning application process. These sites are listed in Appendix C.

3.2.3 As part of the initial identification of sites, a total of 35 sites were ‘excluded’, and no further detailed assessments were carried out. These sites are identified with a red outline on the interactive map and the reason for exclusion is shown in the associated attribute table. A table of excluded sites are listed in Appendix D.

3.3 Stage 2

- 3.3.1 A total of 308 remaining sites were carried through into Stage 2 of the assessment process and assessed in greater detail to determine their development potential. From this process a further 50 sites were deemed 'undevelopable' due to their suitability, availability or achievability and categorised as 'excluded' sites along with those identified during Stage 1. These sites are also identified with a red outline on the interactive map and the reason for exclusion is shown on the associated attribute table.
- 3.3.2 Following the Stage 2 assessment a total of 258 sites are considered deliverable or developable over the plan period. These sites are identified with a green outline on the interactive map and a potential timescale for delivery acknowledged to inform the indicative housing trajectory, along with an estimated yield based on the methodology set out in this report. These sites are listed in Appendix A.

3.4 Stage 3

- 3.4.1 A windfall study (2024) and information relating to housing land supply are published separately to this assessment. It demonstrates that based on historic windfall rates, windfall sites have consistently come available within East Hampshire (outside the SDNP) even during a time of economic recession. As a result, the windfall study proposes a full small site windfall allowance of 54 dwellings per annum from year four onwards. Additionally, a large site windfall allowance of 61 dwellings per annum will be made from year eleven onwards. As of 1st April 2024, this amounts to a total of 1,068 dwellings (702 on small sites, 366 on large sites) across the residual emerging plan period (2024-2040).

3.5 Stage 4

- 3.5.1 There was a total of 481 sites considered within the LAA. Each site identified in Stage 1 and 2 was assessed to determine if it had any development potential and, if so, when it could be brought forward. All details of candidate sites are available on the interactive mapping with detailed information on the associated attribute table.

3.6 Housing

Potential Housing Availability identified in the LAA.

- 3.6.1 Table 1 (below) sets out the number of dwellings that could reasonably be expected to be delivered in East Hampshire (outside the SDNP) as identified in the LAA (without planning permission).

Number of dwellings (net) per delivery period			
Source (location)	1-5 years (2024-29)	6 years + (2029-40)	Total plan period (2024-40)
Within SPB	191	452	643
Outside SPB	1,547	12,278	13,825
Windfall	108	960	1,068
Total	1,846	13,690	15,536

Table 1: Potential number of dwellings per delivery period identified in the LAA

3.6.2 The current housing requirement for East Hampshire (outside the SDNP) is 460 dpa between 2021-2040. This equates to 8,740 dwellings over the emerging Local Plan period (2021-2040).

3.6.3 The total identified potential housing supply is therefore greater than the residual requirement remaining in relation to the standard method when expected housing delivery in the National Park is taken into account. However, this flexibility is not overprovision; instead, it is necessary to ensure that the total residual local housing requirement derived from the standard method can be met and that a robust five year housing land supply can be maintained, particularly in the early years. More details specifically related to five-year housing land supply is available on the Council's website. This flexibility in supply is necessary to enable the plan to adapt to rapid change, as required by the National Planning Policy Framework ('NPPF'), should sites not deliver as planned.

3.7 Employment and other uses

3.7.1 In relation to other uses, the LAA has identified deliverable and developable land that can accommodate the following:

Use Class	Quantum	LAA site reference
Traveller accommodation (sui generis)	Traveller pitches	BTW-006, FM-022, FM-035, FM-036, FM-046, KIN-011, LIP-032, LIP-050
	6 Travelling Showpeople plots	HEA-011
Employment (B1, B2 and B8)	hectares of land	AL-058, BEN-007, CHA-002, CHA-006, LIP-024, LIP-025, LIP-029, LIP-030, MED-009, RC-009, ROP-006, ROP-007, WHI-006, WHI-020, WOR-002, WOR-003, WOR-004
Assembly and Leisure facilities (D2)	2 community facilities (3.5 hectares of land)	FM-027, LIP-008
Cultural and non-residential institutions (D1)	None	
Hotel (C1)	2 opportunities for Hotel use	FM-001, HEA-023
Retail (A1 – A5 use classes)	Not quantified	BEN-007, BIN-011, CHA-005, RC-009, ROP-007
SANG	2 opportunities for SANG	HEA-018, WHI-006
Biodiversity Net Gain (BNG)	1 opportunity for BNG	BEN-021

Table 2: LAA Outputs

4 Conclusions

- 4.1.1 The scale of the housing requirement for the district (outside the SDNP) over the emerging plan period (2021-2040) is determined through a standard methodology set by Government – the 'local housing need assessment'. The requirement during this period is currently 8,740 dwellings. Various other needs are established in other evidence base documents.
- 4.1.2 In response to these requirements, the LAA provides a 'long list' of theoretical sites that have been identified for potential future development. However, the number of sites that have been identified in the LAA is far more than what is currently required in the emerging Local Plan (for most uses). However, the only exception being land for Traveller accommodation, whereby further work is needed to meet the identified needs of East Hampshire.
- 4.1.3 It is extremely important to reiterate that at this stage in the process that any sites which have been categorised as 'included' are considered deliverable or developable for the purposes of the LAA and require further assessment to warrant allocation in the emerging Local Plan. Also, any site would subsequently also require planning permission and their inclusion within this document does not imply either that a site will be allocated in the Local Plan or that permission will be granted. The next stages of the Local Plan site selection process, in conjunction with the Sustainability Appraisal and Habitats Regulations Assessment will help the Council to identify which sites should be allocated for development in the emerging Local Plan.

Next Steps

- 4.1.4 The assessment was produced with the best information available at 31st March 2024. The LAA is an iterative process and as such, any future reviews will incorporate any new information available to the Council. This will include any new sites and additional information about the existing identified sites. Further consideration will also be given to windfalls and if necessary, non-implementation rates.
- 4.1.5 The Council intends to update the LAA annually to take account of new information. Given that new information may be submitted to, and considered by, the Council at any time, conclusions on the suitability, availability and achievability of the identified sites may be subject to change, as are assumptions on whether sites are deliverable or developable over the emerging plan period.

Appendices

Appendix A: Included Residential Sites

LAA Site Reference	Site Address	Parish	Area (ha)	Indicative Capacity
LAA/AL-001	208-212 London Road, Holybourne	Alton	0.25	5
LAA/AL-004	Cowdray Park, Alton	Alton	2.47	61
LAA/AL-005	Land at Brick Kiln Lane and Basingstoke Road, Alton	Alton	21.31	150
LAA/AL-007	Land at Howards Lane, Holybourne	Alton	1.62	6
LAA/AL-013	Land at Weysprings, Alton	Alton	7.38	30
LAA/AL-014	Land at Weysprings Park, Windmill Lane, Alton	Alton	4.94	44
LAA/AL-017	Manor Road, Alton	Alton	0.16	6
LAA/AL-018	Land east of Old Odiham Road, Alton	Alton	6.34	93
LAA/AL-019	Windmill House, Windmill Lane, Alton	Alton	2.96	15
LAA/AL-020	Lindsey's Field (N), south of Water Lane	Alton	6.82	41
LAA/AL-021	Lindsey's Field (S), south of Water Lane, Alton	Alton	6.49	39
LAA/AL-028	Land at Albany House, 5 Omega Park, Alton, GU34 2QEL	Alton	0.53	7
LAA/AL-029	Land west of Old Odiham Road, Alton	Alton	10.11	101
LAA/AL-035	Selborne Road, Alton	Alton	28.08	421
